Server command:
(If using windows)
net start sshd
jupyter notebook --no-browser --port=8889 jupyter lab --no-browser --port=8889

Terminal command:
ssh -N -f -L localhost:8888:localhost:8889 -p 80 xinqi@67.171.70.107
ssh -N -f -L localhost:8888:localhost:8889 qix@exxact1.stat.cmu.edu
(To kill occupied port 8888)
kill -9 $(lsof -ti :8888)

Finally open: http://localhost:8888/
